

USB 3.0 Docking Station with HDD Storage

IOGEAR's Met(AL) Vault Dock, USB 3.0 Universal Docking Station with HDD Enclosure quickly and easily turns your laptop, Ultrabook or Microsoft Surface Pro tablet into a full-featured workstation with support for dual monitors (DVI-I and HDMI). Featuring a gigabit Ethernet port, two USB 2.0 ports, four USB 3.0 ports, two dedicated USB fast-charging ports, microphone /speaker connections with a HDD enclosure, the Met(AL) Vault Dock has connections to suit virtually any application.

Multitask with Dual Monitors

The Met(AL) Vault Dock gives you the power to connect two extra monitors. Dual monitor outputs allow you to edit videos on one screen, compose the soundtrack on another screen and check email on your laptop screen all at the same time!

Great for the Latest 2-in-1 Laptops & Tablets

Tablets and 2-in-1 laptops are portable and easy to use. However, these touchscreen devices lack the range of capabilities that makes desktop computers the standard for workstations. Ultra-portable touch-screen devices oftentimes fall short when it comes to ports, storage capacity, and a fast, comfortable keyboard. With the power of Windows 10 Pro, tablets are now ready to replace your home PC. When it's time to go from leisure time to work, just plug your Windows 10 Pro enabled tablet into the Met(AL) Vault Dock and it becomes your full-blown work center! Now you can create a workstation suitable for nearly any task.

Product Features:

- ✓ Great expansion unit for computers with extra connectivity demand
- ✓ Sleek aluminum housing complements any home or office space
- ✓ Hot pluggable - add or remove devices without system reboot
- ✓ Resumes from hibernation and suspend modes
