Dimensions:	4.5" x 4.375" x 2"
Power Supply:	External 65W 19V AC-DC Power Adapter
Warranty:	5 Year ByteSpeed Warranty Free Lifetime Tech Support

Connect Simply and Securely in Seconds with the ByteSpeed NUC7i5DNHE or NUC7i7DNHE and Intel Unite.

ByteSpeed's smallest desktop, the NUC7i5DNHE or NUC7i7DNHE, feature an Intel Core vPro processor - which combined with FREE Intel Unite software, delivers simple, instant and secure collaboration and meeting capabilities through wireless connectivity.

Collaborate more productively.

Intel Unite is a FREE solution that is transforming conference rooms and classrooms into smart, connected spaces where employees and students - both inside and outside the room - can collaborate more productively.

Intel Unite software provides the ability to lock down your ByteSpeed NUC and create a dedicated appliance for wireless presentation, collaboration and even video conferencing. Once installed on your NUC computer, you can collaborate with people on your local network securely behind your corporate firewall.

Share files quickly and efficiently.

Intuitive and easy to use collaboration features allow you to share files with attendees quickly - without having to email and wait for recipients to receive and/or download attachments. Onsite and remote employees can see the same content. Up to four presenters can share their screens simultaneously, enabling side-by-side comparisons, and real-time annotations.

How it works.

1. DESIGNATE YOUR HUB DEVICE

Designate a ByteSpeed NUC7i5DNHE or NUC7i7DNHE vPro Unite Certified Ready Device as your hub device.

Important: Your hub device must be a vPro Unite Certified Ready device, such as the ByteSpeed NUC7i5DNHE/ NUC7i7DNHE.

2. DEPLOY THE INTEL UNITE SOFTWARE

Deploy the free Intel Unite solution on your hub device, as well as your participant client devices. Intel Unite provides cross-platform support for Windows, OS X, iOS for iPad and Android or tablets also makes it easy for all kinds of devices to come together.

3. ENTER A PIN TO GET STARTED

Enter a secure PIN code (which is unique for every meeting) for quick starts and access to the meeting and any shared content.

Intel Unite Solution: Powerful new features.

Video Playback with Audio

Share HD video and audio with in-room participants from Windows-based clients

Scheduled Meetings

Join meetings with a click - no pin needed!

Collaborate using tablets

View shared content from iPad & Android tablets. Also present from an iPad.

Meeting Lock

Choose only those you want to join a meeting and view content via the Intel Unite application.

Protected Guest Access

Enable in-room guests to view and share - no corporate network access required.
