

Virtual Reality Bundles for Career Pathway Training

featuring a VR-ready laptop, Oculus Rift S headset, & CareerLabsVR software in a mobile case or VR cart.

Give job seekers a hands-on opportunity to explore in-demand careers with CareerLabsVR. ByteSpeed has partnered with CareerLabsVR to provide a customized mobile virtual reality solution for career pathway training.

Stick Welding

See how steady your hand is as you work to weld steel beams of an industrial building and understand the skills needed to become a welder.

Robotics Technician

Run diagnostics, submit performance logs and adjust line speeds as you work to ensure all is running efficiently on a manufacturing line.

Residential Electrician

Install new appliances, find and fix broken wires, assess the voltage, troubleshoot outlet repair, assess outlet voltage, and use tools unique to this trade.

HVAC Technician

Work from a metropolitan rooftop to assess the performance of heating and cooling units, troubleshoot broken fans, wires, refrigerant levels, etc.

Heavy Equipment Operator

Maneuver an excavator through a construction site and try your hand at loading a dump truck. See how your skills align with what it may be like in this career.

MORE APPS COMING SOON!

EXPLORE CAREERS

Give job seekers a hands-on opportunity to explore in-demand careers with CareerLabsVR.

IMMERSE YOURSELF

Harness the power of Virtual Reality to allow job seekers to see, hear and experience potential careers.

MAKE EMPOWERED DECISIONS

Put job seekers in the driver's seat; educating and empowering them to prepare for their future without ever leaving the Career Practitioner's office.

CareerLabsVR provides users the opportunity to explore, learn, and discover a variety of career options through the immersive power of virtual reality. This virtual reality (VR) system not only gives job seekers tailored career information, but also the ability to see, hear, and experience the job from any location.

CareerLabsVR allows the job seeker to immerse themselves in a career experience, something that has been missing from traditional career decision making methods. Research indicates that 90% of what we see and do is retained, making CareerLabsVR incredibly beneficial in involving job seekers.
